

I CLAIM:

1. A cover for a cane comprising:

a piece of a flexible sheet material;

said piece of flexible sheet material having first and second longitudinally extending sides and first and second transversely extending sides such that said flexible sheet material has an overall rectangular configuration;

said first and second longitudinally extending sides being secured together to thereby define a tubular sheath;

said tubular sheath having an opening at either end thereof; and

securement means located at one end of said sheath for securing said sheath in position on a cane.

2. The cover of Claim 1 wherein said piece of flexible sheet material comprises a textile fabric.

3. The cover of Claim 2 wherein said textile fabric comprises a printed textile fabric.

4. The cover of Claim 1 wherein said securement means comprises a drawstring.

5. The cover of Claim 4 further including means for retaining said drawstring in a desired position.

6. In combination, a cane having a longitudinally extending shaft and a handle portion at an upper end thereof, and a cane cover, said cane cover comprising a piece of flexible sheet material, said piece of flexible sheet material being a tubular sheath, said tubular sheath extending over said longitudinally extending portion of said cane, and securement means located at an upper end of said sheath for securing said sheath to said cane..
